SMU SINGAPORE MANAGEMENT UNIVERSITY | School of Computing and Information Systems

Week 06 – Text Analytics

🔍 Key Insights and Learning Outcomes

Students demonstrated strong conceptual and practical understanding in the following areas:

- **Sales Forecasting Techniques**: Students grasped the four main types—opportunity stage, historical, length of sales cycle, and pipeline forecasting.
- **AI in Sales Processes**: Many noted how AI tools (e.g., Gong, Salesforce Einstein) enhance efficiency in early pipeline stages (prospecting, qualifying, discovery).
- **Forecasting as Risk Mitigation**: Students repeatedly emphasised that forecasting is not about certainty but preparation and reducing uncertainty.
- **DATA Framework Application**: The Deduce → Acquire → Tidy → Augment process was widely referenced, especially in dashboard development.
- **Ethical Considerations**: Several reflections linked forecasting and data usage to ethical frameworks like ABCDEF, showing deeper engagement.

😊 Overall Experience and Sentiment

- **Sentiment**: Largely positive. Students appreciated the real-world relevance, hands-on Tableau activities, and guest lectures.
- **Engagement**: High. Many students referenced personal insights, prior internships, and connections to earlier course themes.
- **Confidence**: Mixed. While most felt they understood the concepts, some expressed uncertainty around advanced forecasting methods and analytical question formulation.

🎉 Top Enjoyable Activities or Topics

Activity/Topic	Mentions
Tableau dashboard creation	40+
Guest lectures (Prof Leonard, Prof Raf)	20+
Forecasting practice	15+
Real-world examples and applications	10+
Group discussions and labs	10+

⚠️ Most Challenging Topics

| Challenge Area	Mentions
Creating analytical questions	25+
Tableau chart creation and formatting	20+
Understanding advanced forecasting	15+
Cleaning and prepping data	10+
Differentiating sales process stages	5+

Big Picture

- Customer Acquisition
  - Attract: Marketing
  - Convert: Sales
- Customer Success
  - **Retain: Service** 👉
  - Amaze: Operations
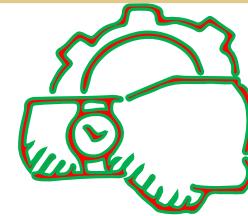

Knowledge

- Understand the four key stages of the customer journey (Awareness, Intent, **Own**, Promote) and their significance in customer relationship management.

- Explore various customer models, including the **Kano Model**, the **Apostle Model**, and understand their applications in measuring **customer satisfaction and loyalty**.

Skills/Tasks

- ❑ Develop the ability to measure and improve quality using Six Sigma **Critical to Quality (CTQ) metrics**, and CTQ trees, ensuring that customer requirements are met consistently.
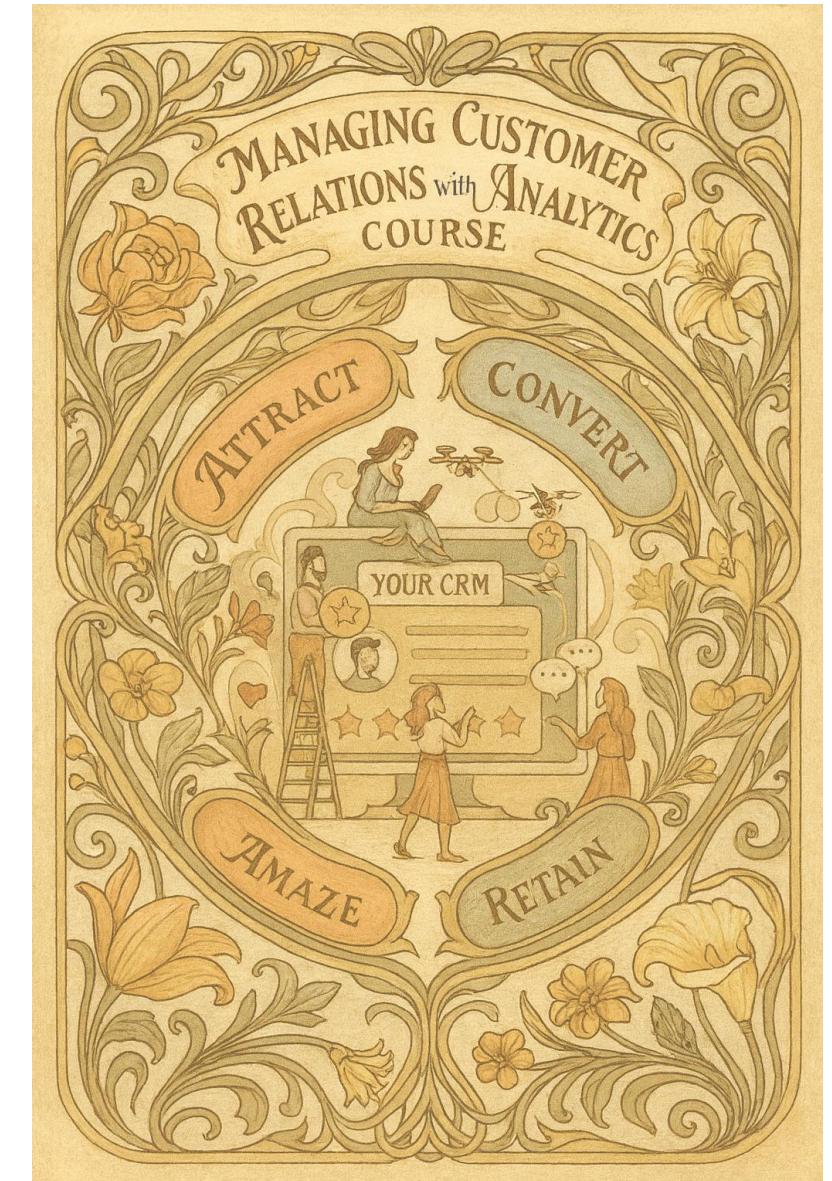

Agenda

01   **Sales Quiz / Team Videos**

02   **Customer Models**

03   **Consistent good Quality**
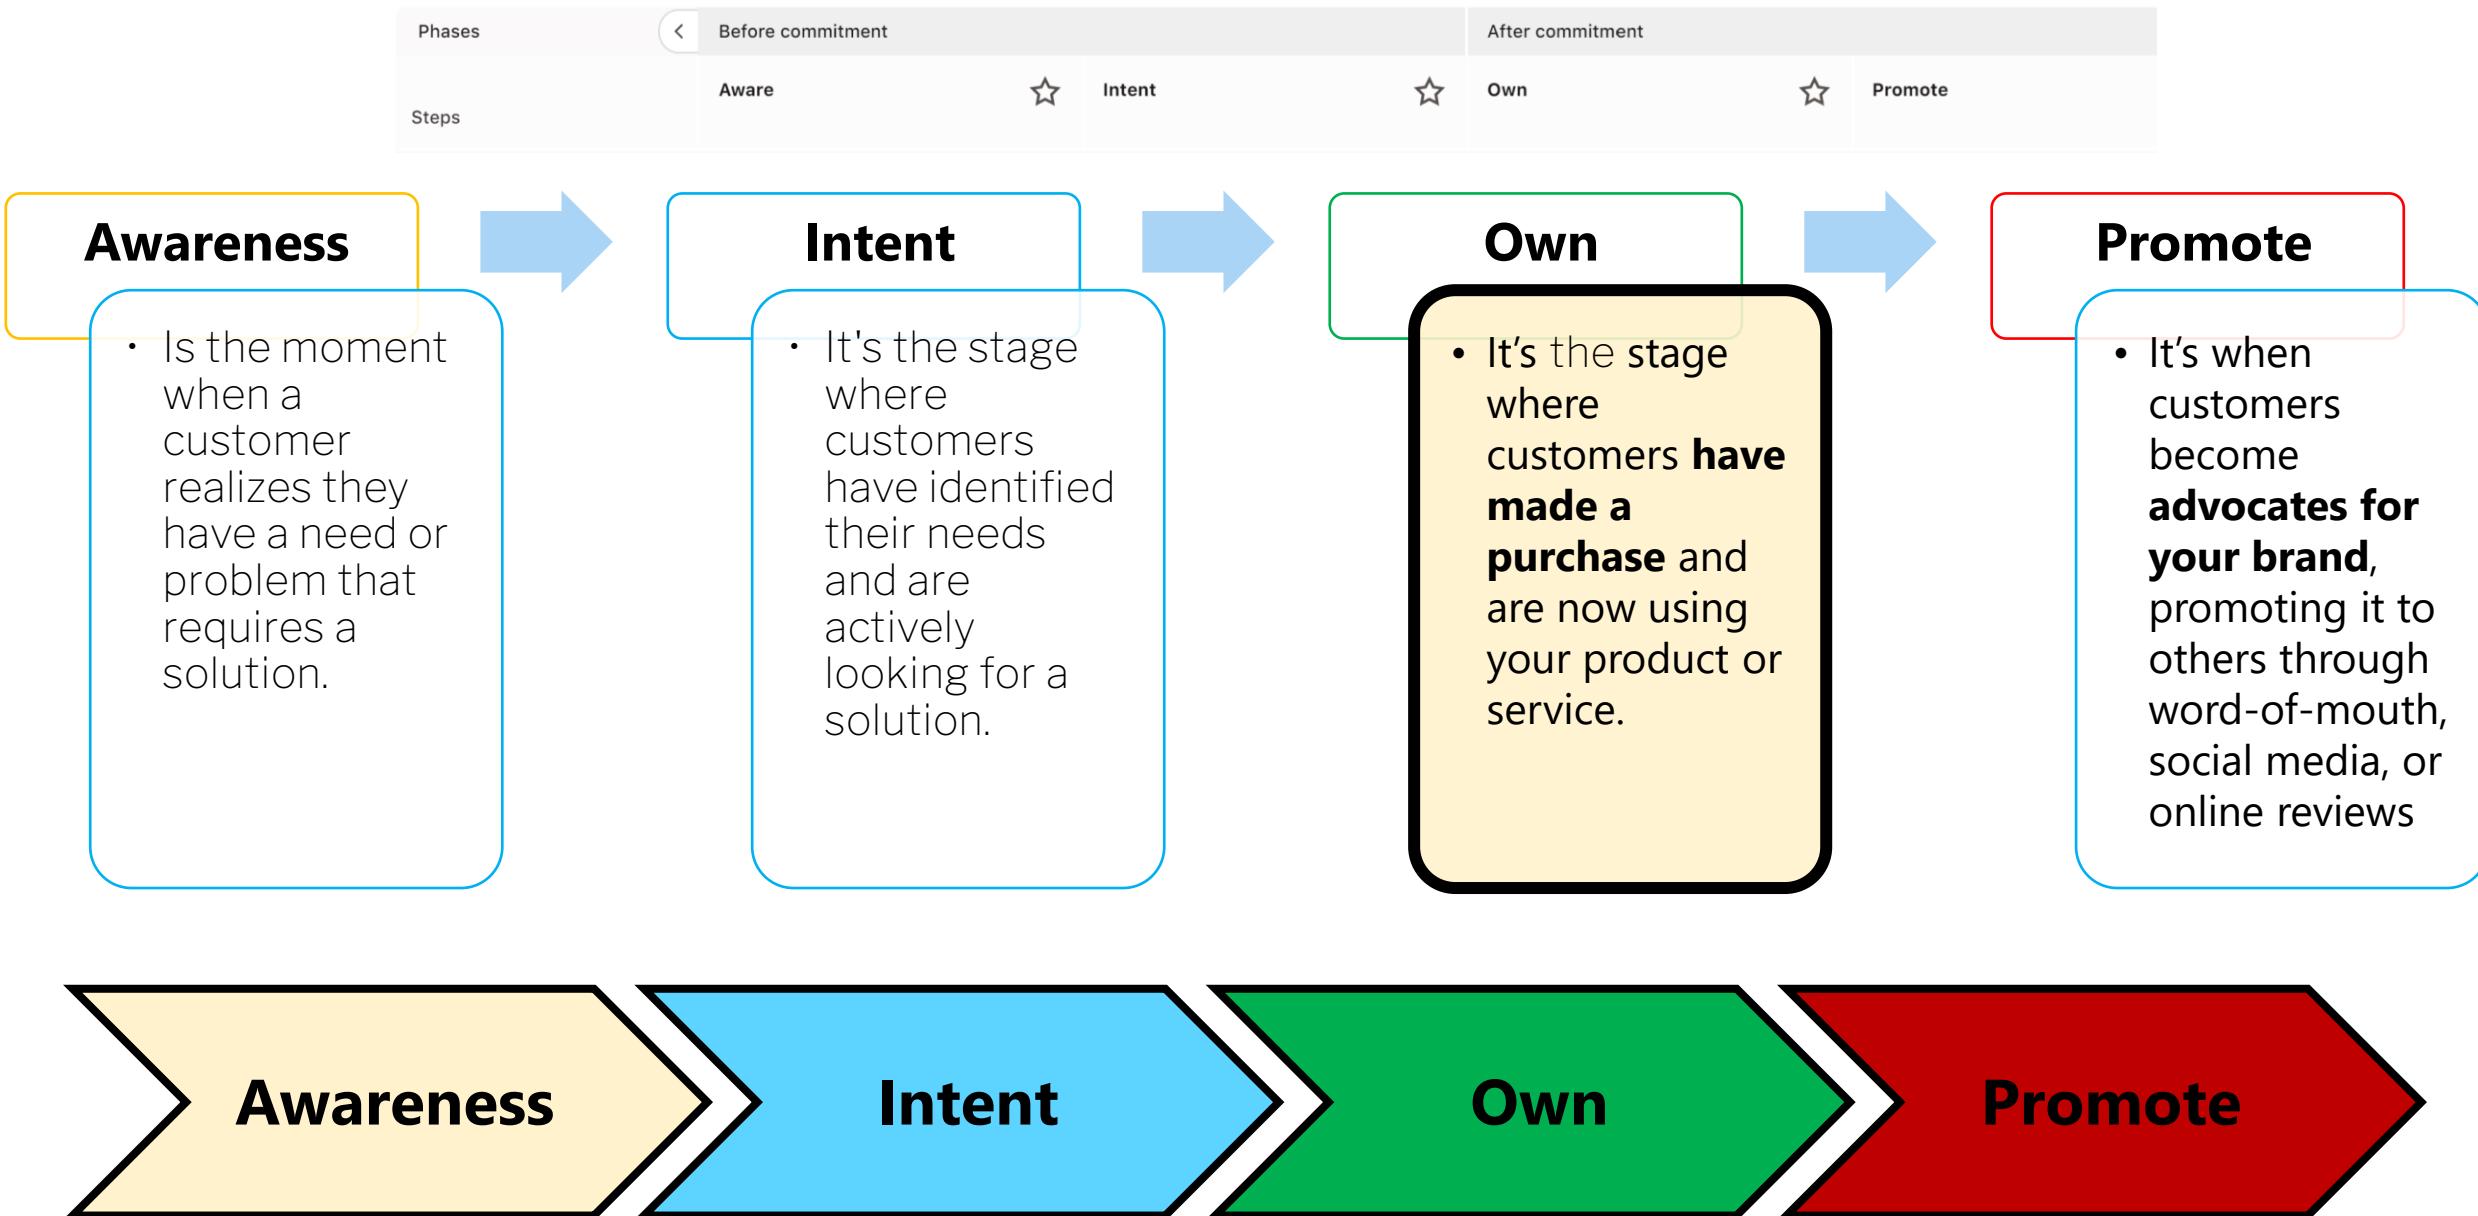

Product is a major category group that includes:

- **Physical products** (food, furniture, computers)
- **Digital products** (digital music, digital documents)
- **Physical services** (massage, hospitality)
- **Digital services** (SaaS, Cloud Solutions)

Customer is also a major category group that includes:

- **Internal customers** (Employees, managers, executives, affiliates)
- **External customers** (Consumers, partners, providers)

AIOP: The generic customer Journey

COMPUTING @ SMU

Phases	Before commitment			After commitment	
Steps	Aware ☆		Intent ☆	Own ☆	Promote

Awareness → **Intent** → **Own** → **Promote**

- Is the moment when a customer realizes they have a need or problem that requires a solution.

- It's the stage where customers have identified their needs and are actively looking for a solution.

- It's the stage where customers **have made a purchase** and are now using your product or service.

- It's when customers become **advocates for your brand**, promoting it to others through word-of-mouth, social media, or online reviews

Awareness | **Intent** | **Own** | **Promote**

Buy – Own – Advocate

- **Onboarding process**: customer's first experience with the product or service after purchase.

- **Customer Success:** proactive approach aims to ensure customers achieve their desired outcomes while using the product or service.

- **Satisfaction and Loyalty:** The "Own" phase is where businesses can significantly influence customer satisfaction and build loyalty.

- **Feedback and Improvement:** Regular collection and analysis of customer feedback during the "Own" phase can provide valuable insights for product improvement and innovation.

By **Augie Ray** | **August 12, 2016**

Customer Orientation

Eras	Customer Orientation	Customer Orientation Description
Product Era **Brand-Centric**	**Production orientation** **(1900s-1930s)**	Focused on **manufacturing efficiency and mass production**, with the belief that consumers would favor products that were available and affordable, emphasizing product availability.
	Sales orientation **(1930s-1950s)**	Characterized by aggressive selling techniques, including personal selling and advertising, with the primary goal being **the persuasion of consumers to buy products.**
Buyer Engagement Era **Demand-Centric**	**Marketing orientation** **(1950s-1990s)**	Revolved around the concept of the Four Ps (product, price, promotion, and place) and the development of market research to **better understand and meet consumer needs and behaviors**.
Buyer/Customer Engagement Era **Audience-Centric**	**Relationship orientation** **(1990s-2010s)**	Aimed at **building long-term customer relationships** and loyalty through understanding and meeting customer needs, emphasizing customer satisfaction and retention.
	Digital orientation **(2010s-present)**	Focuses on leveraging digital technologies and platforms to engage with customers, emphasizing the importance of **digital presence and online customer experiences.**

Excited Quality

Delighters

- Unexpected

- Unspoken

Desired Quality

**Satisfiers**

- Should be present

- Usually spoken

Basic Quality

Dissatisfiers

- Must be present

- Usually unspoken

Satisfaction
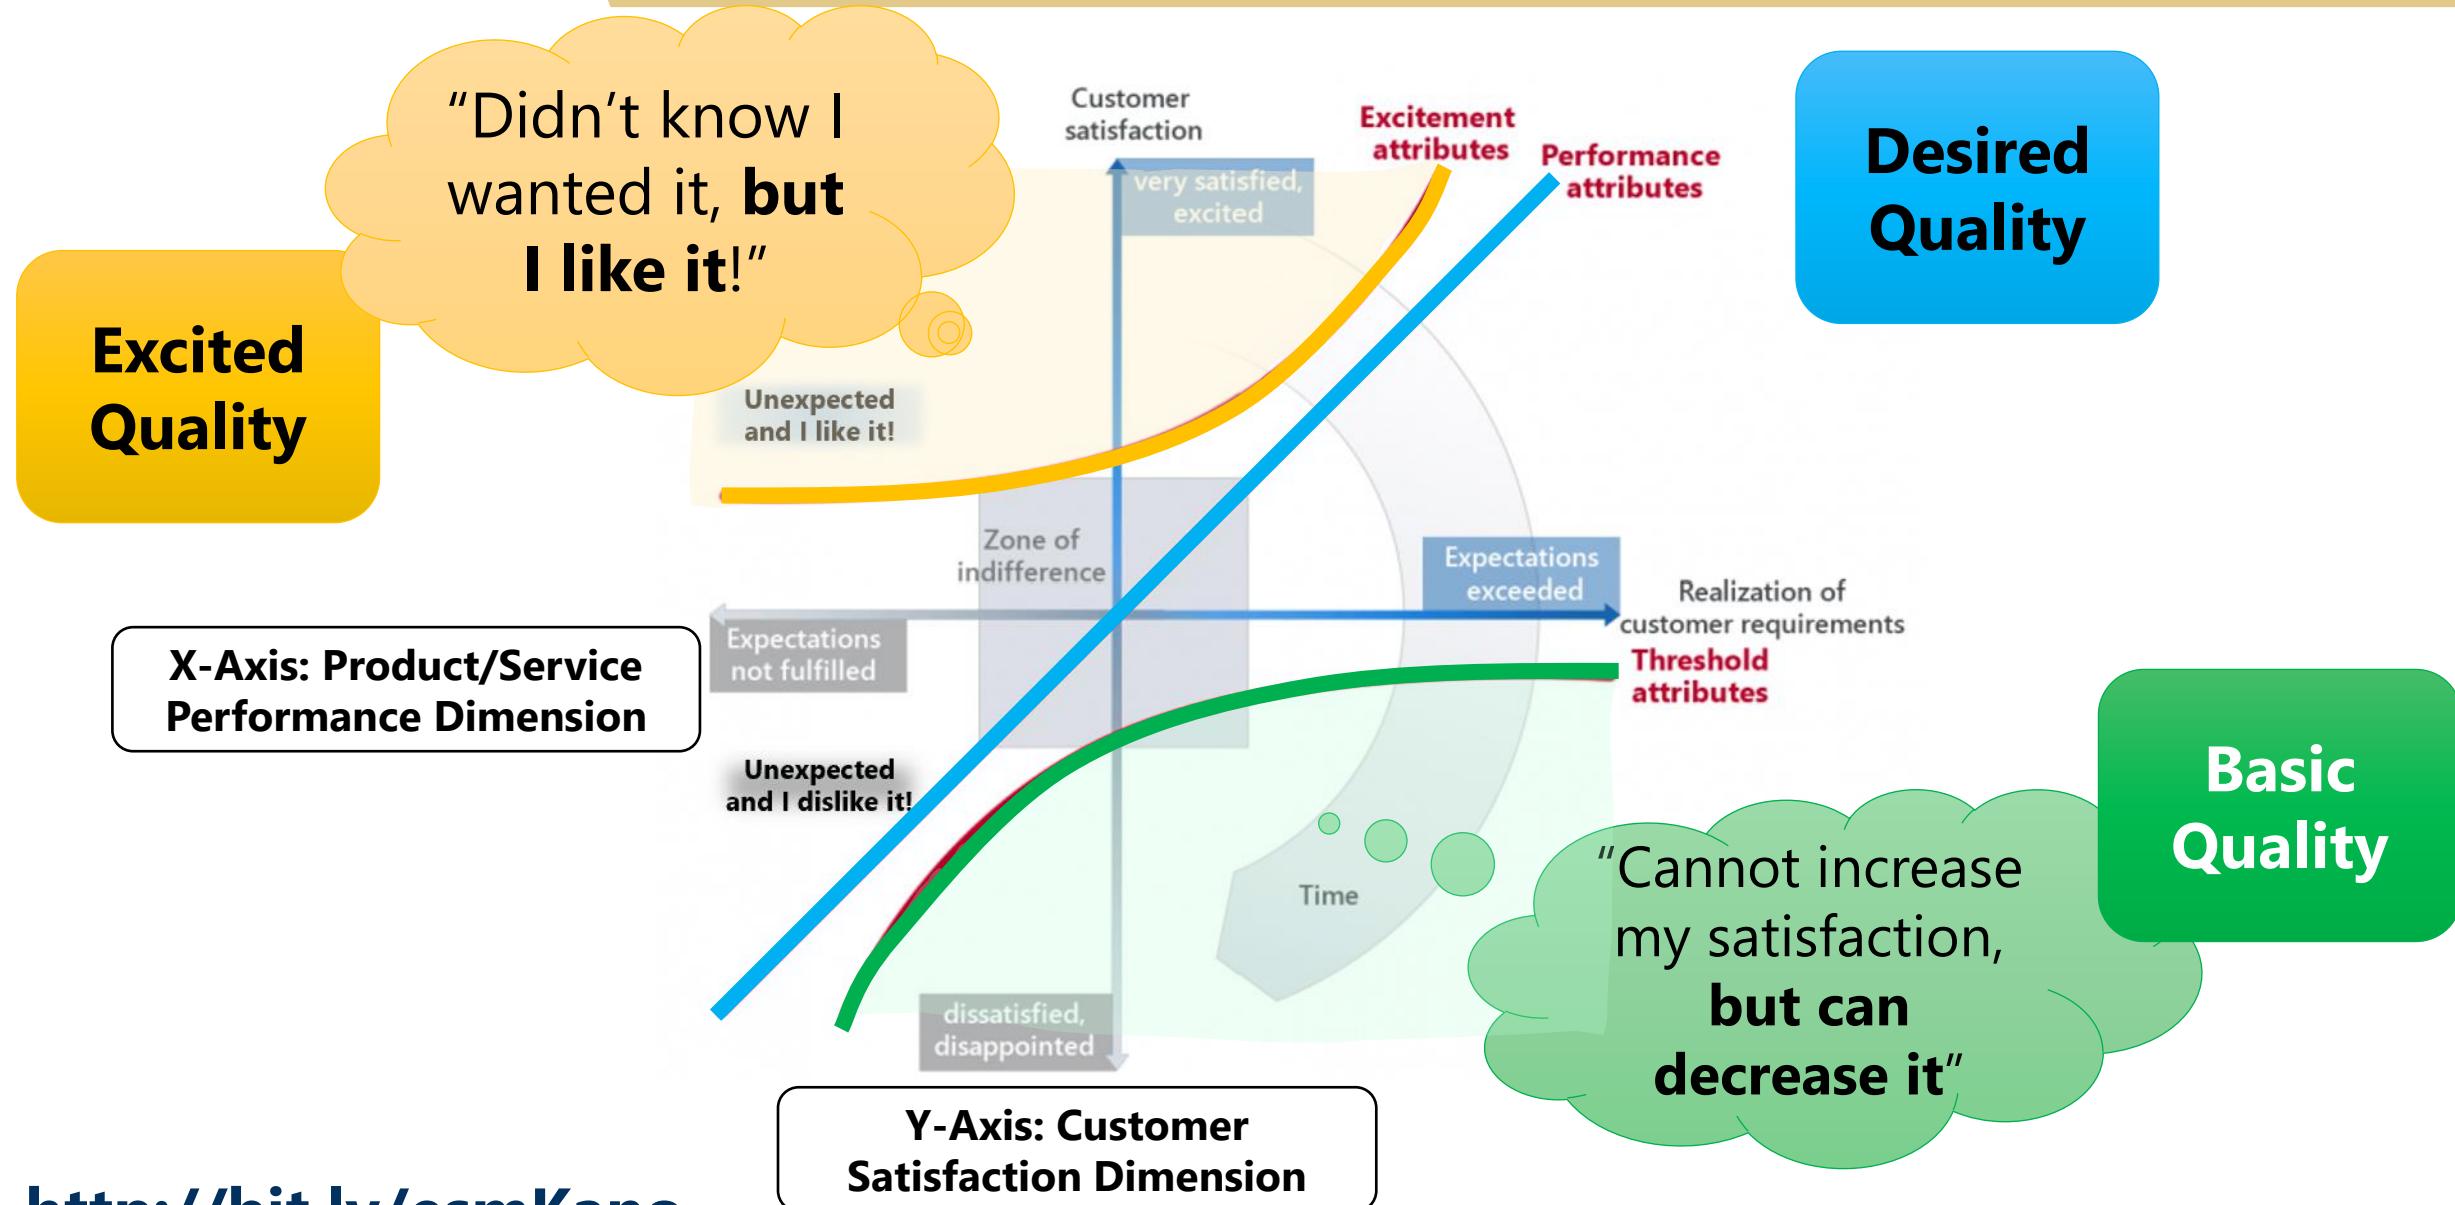

MODEL 39: Customer Satisfaction, Noriaki Kano (1984)

PROBLEM STATEMENT

How might a business meet or exceed customer satisfaction?

Excited Quality

"Didn't know I wanted it, **but I like it**!"

Desired Quality

Basic Quality

"Cannot increase my satisfaction, **but can decrease it**"

X-Axis: Product/Service Performance Dimension

Y-Axis: Customer Satisfaction Dimension

http://bit.ly/esmKano

Excited Quality

Desired Quality

Basic Quality

- **Delighters (excited by, unspoken)**
  - Unexpected features or characteristics that impress customers and earn the company "extra credit."
  - May become **expected quality** in the Future.
  - Associated to the Excitement Attribute line on the Kano graph

- **Satisfiers (Should be, usually spoken)**
  - Standard features that increase or decrease satisfaction by their degree.
  - Associated to the Performance Attribute line on the Kano graph

- **Dissatisfiers (Must be, usually unspoken)**
  - Usually, these are unspoken as is expected
  - A customer expects that their hotel room will be clean and have a comfortable bed.
  - Associated with the Threshold Attribute line on the Kano graph
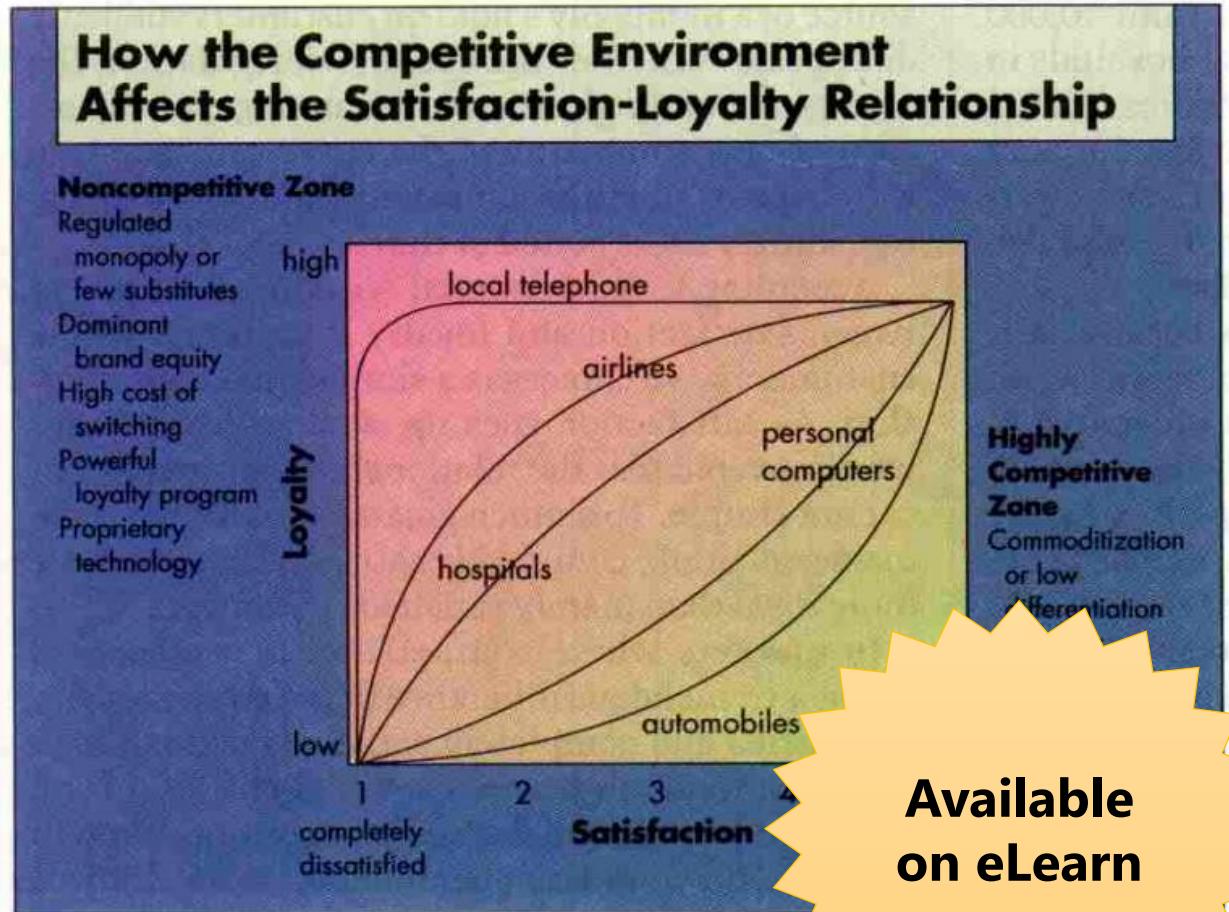

Applying Kano Model

Meet **Seafood Delights Pte Ltd** a versatile food and beverage company operating in Singapore.

The company runs two distinct businesses:

1. An **economical rice stall** at Marina Bay Sands food court, offering affordable meals priced at around $10 per serving (compared to $5 at typical hawker centers).

2. A **high-end catering service** that caters to executive events and luxury functions at Marina Bay Sands.

Loyalty

Satisfaction

How the Competitive Environment Affects the Satisfaction-Loyalty Relationship

Noncompetitive Zone
Regulated monopoly or few substitutes
Dominant brand equity
High cost of switching
Powerful loyalty program
Proprietary technology

Highly Competitive Zone
Commoditization or low differentiation

local telephone
airlines
personal computers
hospitals
automobiles

Loyalty — high / low
Satisfaction — 1 completely dissatisfied, 2, 3, 4

HARVARD BUSINESS REVIEW   November-December 1995

Journey to Satisfaction → **Perfect Product**

Customers are satisfied whenever they consistently receive, in a timely fashion, a perfect product.

Perfect as in thoroughly done, Zero (0) defects.

Timely as at the right time, this conflicts with perfect.

Nothing — Time/Effort

MVP – Minimum Viable Product — Time/Effort

Time/Effort

Good Product — Time/Effort

Time/Effort

.: — Time/Effort

Perfect Product

Time/Effort/Cost

Charles Louis de Secondat, Baron de La Brède et de Montesquieu, generally referred to as simply **Montesquieu**, was a French judge, man of letters, historian, and political philosopher.

Perfect is the enemy of the good.
– French philosopher Voltaire

PERFECT — QUALITY ITERATIONS
'Amazity' Quations
Quality
Iterations

TIMELY — SPEED
QUICK DELIVERY
VJICK DELIVERY
QUICK DELIVERY
SNICK DELIVERY

Around 1726, in his *Pensées*, Montesquieu wrote
"*Le mieux est le mortel ennemi du bien*"
(The best is the mortal enemy of the good)

How to measure Quality?

Why Quality Needs to be Measured

- In any process, whether it's manufacturing a product or providing a service, **ensuring high quality is essential**.

- Quality needs to be measured because it helps us understand how well we are meeting customer expectations and requirements.

- By measuring quality, we can identify areas for improvement, reduce waste, and enhance customer satisfaction.

**In Six Sigma, quality problems are called defects, defined as anything outside a requirement**

What are "Critical to Quality" (CTQs)?

- A defect is anything that doesn't meet a specific requirement. To measure and improve quality, Six Sigma focuses on key performance indicators known as "Critical to Quality" (CTQs).

- These are specific, measurable aspects of a product or process that are crucial to meeting customer requirements.

SMU | School of Computing and Information Systems

CTQ trees are a tool used to translate **broad customer needs** into **specific, measurable requirements** for a product or service. They help organizations understand what's truly important to customers and how to deliver on those priorities.

1. **Need**: This is the high-level customer requirement, often expressed qualitatively.
2. **Drivers**: These are the key factors that influence the customer's perception of quality for that need.
3. **CTQs** (Critical to Quality metrics): These are the specific, quantitative measurements used to assess performance for each driver.

Need

Good Customer Service

Participation Points

- **We love to read your reflections on what we covered in our session today.** Taking a few moments to do this each week is a powerful learning tool.

- **It helps you grow:** Regularly reflecting helps sharpen your analytical skills, organize your thoughts, and spark new creative ideas.

- **It helps our class:** Your feedback is incredibly valuable and helps us improve the course for you in real-time.

- **It's part of your grade:** Timely submissions count toward your participation grade.
